

**ADVANCED  
MANUFACTURING &  
INFRASTRUCTURE**

KEEL provides heavy fabrication and precision machined components critical to your operation. By maintaining tight tolerances, meeting quality requirements, and providing reliable deliveries, we ensure your operation keeps moving and producing.

That is why heavy equipment companies rely on KEEL to help them deliver the impressively strong, durable and reliable products relied upon by millions. From machining to fabrication and assembly to delivery, KEEL is built to last.

# WHERE STRENGTH MEETS DEPENDABILITY **BUILT FOR TODAY. TOMORROW. FOREVER.**

## **MASSIVE DIMENSIONS**

There is nothing small about the world of heavy equipment manufacturing. From large components to even larger fabrications, these products must be tough, durable and ready for hard work. Manufacturing massive products and machinery demands a serious production partner. KEEL has the experience, strength and dependability you need.

## **INCREDIBLE STRENGTH**

When a customer needs 100-ton lifting capacity or fabrications over 80' in length, we are ready for them. When jobs call for machining on specially formulated metals or custom welding, our team has the experience and technology to get the job done.

## **LEGENDARY DURABILITY**

It is not enough to build the strongest parts and components; heavy equipment must survive thousands of hours of repetitive high-stress operations in harsh environments. KEEL can machine the toughest materials, employ durable fabrication techniques, and finish your products in specialized coatings to deliver long-term performance.

**FIND YOUR SOLUTION AT  
KEELUSA.COM**

## **EXACTING PRECISION**

The incredible size and strength of heavy equipment products often overshadow the fact that they typically also require exceedingly precise machining and fabrication tolerances. At KEEL, we bring aerospace-grade precision and colossal size and strength together in one highly efficient production partner.

## **DEPENDABLE DELIVERY**

Your product must be on site, ready to work, on schedule. You need reliable partners with a robust supply chain and proven record of delivering finished products on time. Many of our KEEL team members have worked in the industry for decades, building supplier relationships to ensure we have the tools and capacity you need, when you need them.

## **CUSTOM PRODUCTION**

Whether you're manufacturing complex assemblies or simple components, short production runs present unique challenges. KEEL's array of multi-function machinery and cross-trained team of professional operators offer the production flexibility needed to cost-effectively tackle your custom production needs.

**What we build, builds us.**
