

We supply cutting-edge steel fabrication solutions for crucial maritime technologies and mission-critical naval programs. Our advanced manufacturing techniques ensure precision, reliability and success - eliminating the high cost of failure for demanding systems.

WHERE PRECISION MEETS POWER

MISSION SUCCESS

STARTS HERE

MISSION CRITICAL

Every production decision matters but never more than with mission-critical products and parts. This is serious work, and it demands serious production partners. At KEEL, we do whatever it takes to ensure your mission-critical parts will meet or exceed the exacting safety and performance requirements in the field.

CLASSIFIED FUNCTIONALITY

KEEL carefully guards the performance specifications, design and material implications of products used by our maritime defense partners every single day.

MASSIVE DIMENSIONS

It's always better to have *more than you need* than to need *more than you have*. This is why KEEL has more than 700,000 square feet of manufacturing floor space and custom machinery that can adapt to work on projects ranging from radar systems to rocket components to missile launch platforms.

EXACTING PRECISION

Achieving the exacting standards of demanding systems often comes down to manufacturing differences that can only be measured by lasers. We have the capabilities you need for the accuracy and precision your product demands.

DEMANDING MATERIALS

From shipbuilding to missile defense components, maritime defense projects routinely call for specialized materials and handling. KEEL's technology, expertise and resources mean that you can get everything you need, all from one source.

CUSTOM PRODUCTION

KEEL is custom-built for secure short-run and bespoke manufacturing projects. So, when your program needs special tooling and precise machining, but the order quantity and tight tolerances make your suppliers wince, KEEL has the maritime defense team you can count on.
